Travertino Romano

The stone of Ancient Rome

The stone of the Colosseum, Travertino Romano stands out for its horizontal strata and natural pores, left open or filled. Warm and slip-resistant in honed or aged finish, it is perfect for terraces, pool surrounds and façades.

DON'T CONFUSE IT WITH

Recognisable by its pores and horizontal bands: compare its shade with Travertino Avorio on a sample.

Natural stone is unique: colours and veining vary from one slab to another. We recommend choosing your slabs in person or from photos before ordering.
